Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/560,875	Applicant(s) KIKUT ET AL.	
	Examiner PAUL T. CHIN	Art Unit 3652	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of the election of species of Figs. 9-11, in the reply filed on Mar 3, 2009 is acknowledged. The traversal is on the ground(s) that "the various embodiments of Figs. 5 to 11 follow the same idea and are quite similar in their construction". This is not found persuasive because the listed species have clear differences on the structure and orientation of the mounts with respect to the frame.

The requirement is still deemed proper and is therefore made FINAL.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on Dec 13, 2005, was filed and the submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 24-29, and 35-37 are rejected under 35 U.S.C. 102(b) as being anticipated by the German Patent (DE 20004369).

The German Patent (DE 20004369) discloses a manipulator comprising a frame (Fig. 1) having a docking site (Fig. 1), a plurality of device parts (Fig. 1), and a safety means (Figs. 2 and 4-8) and a junction point.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 30-34 and 38-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over the German Patent (DE 20004369) in view of the European Patent (EP 0386729).

The German Patent (DE 20004369), as presented above, does not specifically show a detector for detection. However, the European Patent (EP 0386729) teaches the detector (Figs. 1 and 2). Thus, it would have been obvious to those skilled in the art to provide a detector on the German Patent (DE 20004369) as taught by the European Patent (EP 0386729) to detect the movement of the German patent's device.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kikut (6,398,279) shows a coupler for gripping.
